UNITING EUROPE'S ENERGY, TODAY

State of MRVA in the Energy Community

Tomasz Karpiński - Energy Community Secretariat

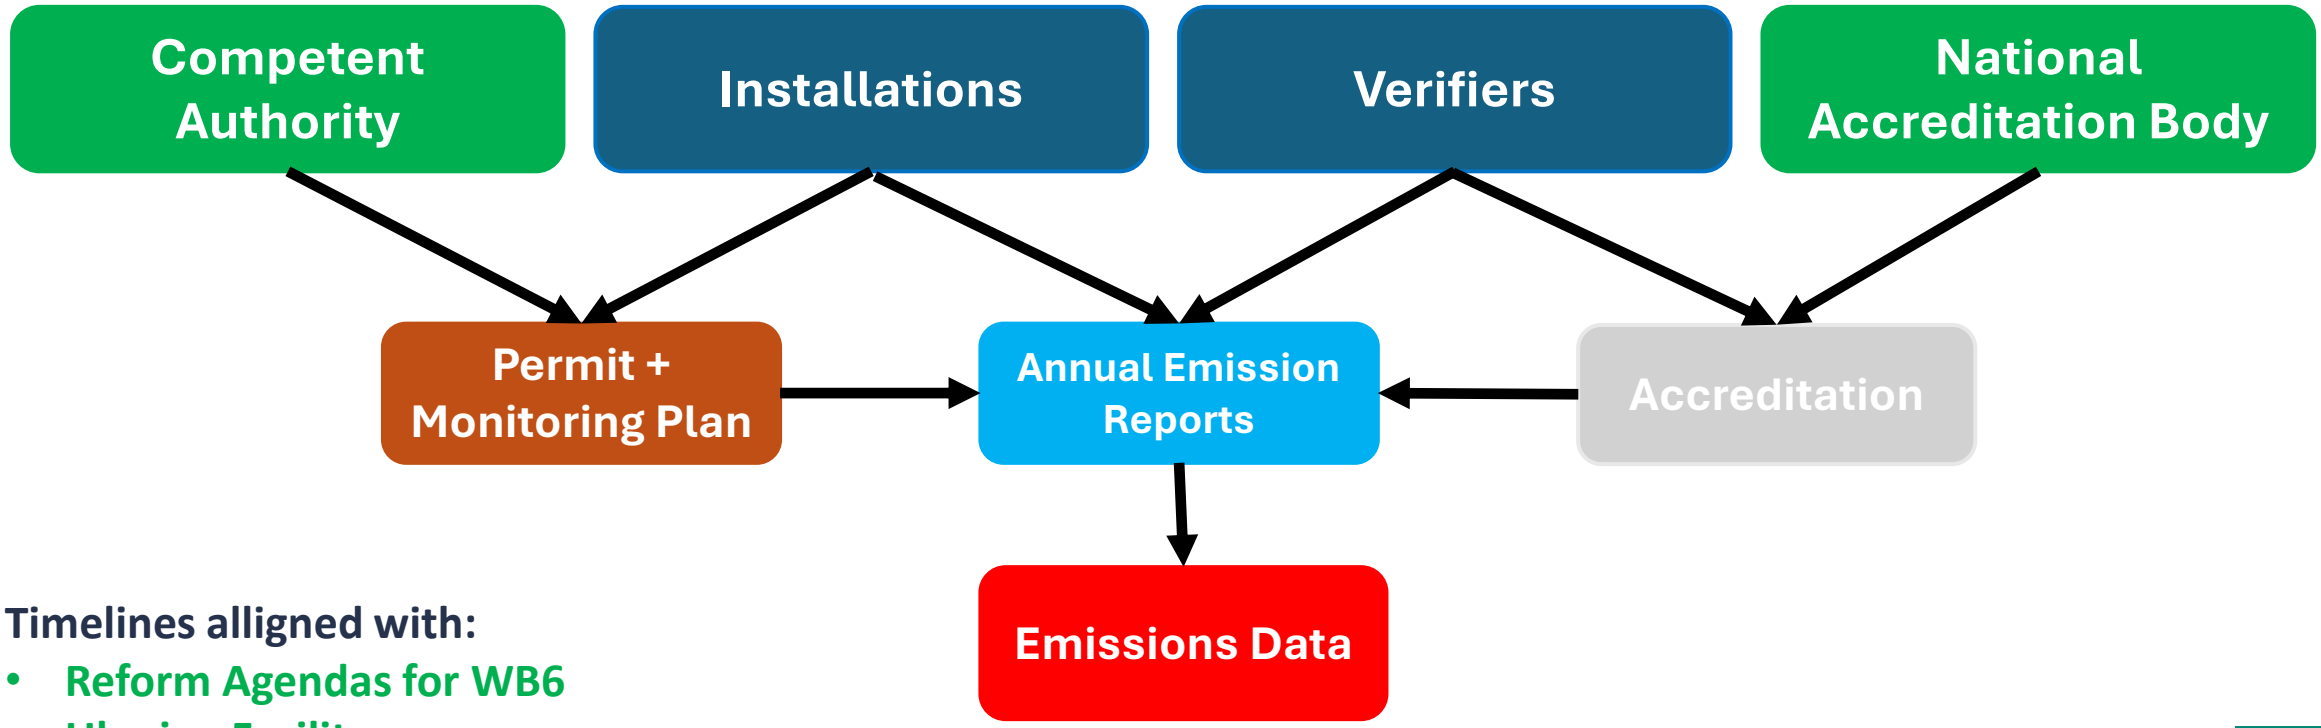
June 2025

MRVA in Energy Community:

December 2022, Energy Community Ministerial Council adopted decision No. 2022/05.MC-Enc, which requires the transposition of the following EU legislation: **EU ETS Directive** (**MRVA elements, scope of activities, list of GHGs**), **MRR Regulation**, **AVR Regulation**

Transposition deadline: 31 December 2023

Tentative period to fully implement, but not later then on **1 January 2026**.



Timelines alligned with:

- **Reform Agendas for WB6**
- **Ukraine Facility**

Status of Transposition and Implemantation:

Challenges and capacity gaps:

- Complicated and time-consuming legislative process.
- Organisational, human, financial resource gap!
- Need to build accreditation system from scratch.
- Different legal and regulatory environment:
  - Lack of national versions of international EN/ISO standards,
  - Limited access to accredited laboratories,
  - Differences in metrological control over measurement instruments.
