

LIFE VII EW 2050 Webinar

Changing the scope of the EU Emissions Trading Scheme

18.05.2023 (Thursday) – 14:00 – 15:30 (CET)
online: Webex

After months of negotiations, the EU is about to adopt the Fit for 55 package: a set of **legislative reforms** that embody the impressive dynamics and the level of ambition of the European Union's climate policy. In the latest report of the [Centre for Climate and Energy Analyses](#) (CAKE), we highlight the **impacts of these developments on the economy of the EU and Poland until 2050**, discussing several options of **extending emissions trading to new sectors** with a significant impact on the future of the green transformation in our part of the globe.

The results of our analysis may provide **useful guidance to those developing countries** that are looking at supporting the implementation of their climate policies through fully-fledged and Paris Agreement-compatible carbon markets, with a view to the future linking for a truly global impact.

Meeting schedule:

- 14:00 – 14:05 Welcome, Introduction, meeting netiquette and agenda
- 14:05 – 14:10 Icebreaker
- 14.10 – 14.30 [Changing the scope of the EU Emissions Trading Scheme](#) as an example of climate change policy with the significant impact worldwide
Jan Witajewski- Baltvilks, CAKE expert
- 14.30 – 14.40 Q&A
- 14.40 – 15.20 Active discussion: Guidance to developing countries on how to implementation of their climate policies through fully-fledged and Paris Agreement-compatible carbon markets as well as knowledge supported decision making.
- 15.20 – 15.30 Conclusions

Project entitled „The impact assessment of the EU Emission Trading System with the long-term vision for a climate neutral economy by 2050 (LIFE VII EW 2050 – LIFE19 GIC/PL/001205)” is co-funded by the Life Programme of the European Union and the National Fund for Environmental Protection and Water Management.
